

## SAF Pumps

SAF1-YL

SAF Pump with Stand and Winch  
(Drum Supplied by Lubricant Supplier)

These pneumatic barrel pumps, SAF1-YL with one outlet and SAF2-YL with two outlets are designed for use in spray systems for the supply of adhesive lubricants (NLGI 0 and 00). SAF pumps are placed directly into 200 liter drums. They do not require a follower plate, thus the supply of lubricant is possible even if the drum is severely dented. With the aid of an optional stand and winch unit, it is easy to exchange barrels.
